PZ STEEL TRADING LTD

SUPPLYING QUALITY STEEL PRODUCTS TO
THE CYPRUS CONSTRUCTION INDUSTRY

PZ Steel Trading Ltd has an established reputation for in-depth product knowledge and broad experience in the supply of steel products to the construction industry. Using a well-established network of international steel manufacturers, the company can source an unprecedented range of high quality steel rebars, steel mesh and rebar in coils at consistently competitive prices.

Steel rebars, steel mesh and rebar in coils all conform to the highest standards (CYS EN 10080 with steel grade B500C). All products are stocked in-country and stored under cover to protect them from adverse weather conditions. A sophisticated weighing system is used to ensure correct consignment quantities.

STEEL REBARS

Steel rebars are fundamental in reinforcing concrete structures to support heavy loads. The rebars supplied by PZ Steel Trading Ltd are of high quality mild steel, ridged for firm adhesion to the concrete. Various metric bar dimensions are available to meet specification requirements.

STEEL MESH

High quality welded steel wire mesh offers strength, stability and versatility together with corrosion resistance and oxidation resistance achieved by electro or hot-dip galvanisation treatment. Available from stock is a standard 6m x 2.4m configuration, in a wide range of wire diameters and opening sizes.

STEEL REBAR IN COILS

For customers who have automatic straightening and cutting equipment, coiled rebar is the preferred product. PZ Steel Trading Ltd offers coiled rebar in different diameters, to suit various application requirements.
